

# Integrations

Privileged and Confidential

# What are integrations and how do they help your business?

- Integrations allow systems to work together automatically.
- They act like bridges between a POS and other systems.
- No manual intervention needed.
- Services:
  - - Login
  - - Register Users
  - - Invoice Upload
  - - Points Redemption
  - - Promotions Redemption
  - - Transaction Cancellation

# API – Application Programming Interface

- Client Systems: POS, ERP, Ecommerce, Web, App.
- Leal: API → Platform.
- Our API lets client systems connect to Leal securely.
- Think of it as a digital waiter.
- - API Docs: [\[Link\]](#)
- - Flow Diagrams: [\[Link\]](#)
- - Video: [\[Link\]](#)

# iPaaS – Integration Platform as a Service

- Tool: n8n
- Sources: POS, ERP, Web, SFTP, DBs.
- Used to collect, transform, and store data securely.

# Agents – Leal Desktop App

- Connects to local DB to securely send info to Leal.
- Fully automated.
- No impact on POS operations.

# Web Cashier – Leal Web App

- Cashiers manually input info into the platform.
- Data is sent securely to Leal servers.

# Integration Capabilities

- Integration types: API, iPaaS, Electronic Agent, Lite Agent, Web Cashier.
- - Registration
- - Accumulation
- - Redemption
- - Cancellation
- - SKU Capture
- \* Some features depend on POS capabilities.

# Integration Comparison

- API – High effort, custom dev.
- Agent – POS must be supported.
- SFTP – Moderate effort.
- Web Cashier – Easy plug & play.
- - Registration
- - Accumulation
- - Redemption
- - Ecommerce
- - SKU
- - Coins
- - Cancellation

# Integrated POS Examples

- Aldelo, AmigoPOS, ICG, AlegraPOS, Siesa, GamaSoft, GlobalSoft, HenkoPOS.
- \* Compatibility matrix is under construction.
